

COMPETITIVE ADVANTAGE

NUESTRA MISIÓN

En Hispaniola Aquatic Adventures protegemos los ecosistemas de los que dependemos, empoderamos a nuestra gente y dejamos una huella positiva en cada lugar donde operamos — a través de la Bávaro Reefs Foundation, la organización sin fines de lucro que sostiene esta misión en la República Dominicana.

CHANGE:

Our Mission

Every journey you take helps protect the Caribbean you came to discover.

At Hispaniola Aquatic Adventures, we believe tourism should leave places better than it found them. Every guest who joins us helps restore coral reefs, protect marine wildlife, support local communities and fund long-term conservation through the Bávaro Reefs Foundation.

But our commitment goes far beyond reef restoration.

Over the past few years, our team has led one of the Dominican Republic's most impactful marine conservation initiatives. After documenting repeated boat collisions with endangered green sea turtles, we helped drive the protection of one of the country's most important coastal ecosystems. Today, that protected marine area is actively managed through a collaboration between our Foundation and the Ministry of Environment, with dedicated park rangers working every day to safeguard its future.

When you sail with us, you're not simply booking a tour.

You're helping restore coral reefs.

You're protecting endangered wildlife.

You're supporting environmental education.

You're creating opportunities for local families.

And you're proving that tourism can become one of nature's greatest allies.

Because the greatest souvenir isn't what you take home.

It's knowing you helped preserve the Caribbean for everyone who comes after you.

FUNDACION:

CHANGE:

1. CONSERVATION & PROTECTED AREAS

Every conservation project we lead has one shared purpose: protecting the ecosystems that make Punta Cana extraordinary. Together with our guests, scientists and environmental authorities, we restore reefs, protect endangered wildlife and create measurable impact that will benefit the Caribbean for generations to come.

01. Marine Protected Areas

Protecting an ecosystem is the greatest form of conservation.

Our conservation work helped support the creation of a protected marine area, now managed in collaboration with the Dominican Republic's Ministry of Environment. Together, we're implementing long-term actions that safeguard one of Punta Cana's most valuable coastal ecosystems.

02. Green Sea Turtle Conservation

Protecting one of the country's most important sea turtle habitats.

The reefs where we operate are home to one of the Dominican Republic's largest populations of endangered green sea turtles. Through monitoring, education and active protection, we work every day to make these waters a safer place for future generations.

03. Coral Reef Restoration

Rebuilding reefs, one coral at a time.

From coral nurseries and laboratory propagation to microfragmentation and outplanting, we use science-based restoration techniques to help damaged reefs recover and create healthier marine habitats.

CHANGE:

2. Community & Environmental Education

Conservation succeeds when people become part of it.

We work alongside local communities, schools, authorities and thousands of visitors every year, transforming every tour into an opportunity to inspire environmental awareness and create lasting change

CHANGE:

Exceptional experiences begin with exceptional people. We invest in fair compensation, continuous training, performance incentives and a culture where every team member feels valued. By taking care of our people first, we create better experiences for our guests and a stronger future for our community.

OPERACIONES RESPONSABLES

A dónde va tu aporte

La sostenibilidad empieza desde adentro. Por eso, por cada huésped que sube a bordo, una parte de la reserva ya está destinada — de forma fija, no de lo que sobre.

US\$ 3.50 por huésped

A nuestro equipo operativo

Compensación justa, capacitación, seguridad y prácticas responsables.

US\$ 2.00 por huésped

A las iniciativas de la fundación

Restauración de coral, monitoreo de tortugas verdes y trabajo con la comunidad.

CHANGE:

Where Your Contribution Creates Impact

Every guest who joins us contributes directly to both people and nature. A fixed portion of every reservation is invested in our team and the conservation projects led by the Bávaro Reefs Foundation—because lasting sustainability begins long before we set sail.

US\$ 4.50 per guest

Investing in Our People

Fair compensation, continuous training, performance incentives, workplace safety and the operational teams that make every experience seamless—from reservation to return.

US\$ 2.00 per guest

Protecting the Caribbean

Coral reef restoration, green sea turtle conservation, environmental education, protected marine areas and community initiatives through the Bávaro Reefs Foundation.

Every contribution is fixed per guest—not based on what's left over—ensuring continuous investment in both our people and the protection of Punta Cana's marine ecosystems.

NUESTRA FUNDACIÓN

Fundación Ecológica Arrecifes de Bávaro

Detrás de cada tour hay una fundación con nombre propio: la que en 2016 arrancó la restauración coralina en Playa Bávaro junto al Ministerio de Medio Ambiente, hoy el tercer vivero de coral más importante del país.

CHANGE:

Bávaro Reefs Foundation

Protecting the place that has given us everything.

Founded in 2016, the Bávaro Reefs Foundation was created with a simple belief: if our business depends on the ocean, we have a responsibility to protect it.

We didn't create a foundation to support our business.

We built a business that could support conservation.

Working alongside the Dominican Republic's Ministry of Environment, we've helped restore coral reefs, protect one of the country's most important green sea turtle habitats and contribute to the conservation of the protected marine area where we operate today. Every guest who sails with us helps make this work possible.

QUIÉN ESTÁ DETRÁS

Tres firmas sostienen la fundación

Nace de la pasión compartida por el medio ambiente de dos personas, con el respaldo de la empresa cuya operación fue testigo del problema.

Built by people who refused to look away.

The Bávaro Reefs Foundation was born from the shared vision of marine conservationists and Hispaniola Aquatic Adventures. What began as a commitment to protect the reefs where we operate has grown into one of the Dominican Republic's leading marine conservation initiatives—bringing together science, education, community engagement and long-term environmental stewardship.

CHANGE:

EL PROYECTO INSIGNIA

Arrecifes artificiales

Crear las condiciones ecológicas necesarias para la restauración y el desarrollo de arrecifes coralinos, a través de la vigilancia y protección ambiental.

Real conservation isn't measured by the number of corals we plant. It's measured by the ecosystems we help bring back to life. Healthy reefs need more than coral. They need an entire ecosystem to thrive.

01 | Coral Reef Restoration

Restoring the foundation of marine life.

We rescue coral fragments, grow them in our nurseries and laboratories, and transplant them using advanced restoration techniques to rebuild healthy reefs.

02 | Restoring Marine Biodiversity

A healthy reef needs abundant marine life.

Our restoration strategy goes beyond corals by increasing fish populations, protecting key species and rebuilding the ecological balance that allows reefs to flourish naturally.

(Mucho más potente que simplemente "Aumentar especies clave".)

03 | Cleaner Oceans

Healthy ecosystems begin with clean waters.

Regular coastal and underwater clean-up campaigns remove marine debris, improve habitat quality and protect the ecosystems that support marine life.

04 | Working with Local Fishermen

Conservation succeeds when communities succeed.

We work alongside local fishermen, promoting sustainable practices and creating opportunities that align livelihoods with long-term marine conservation.

05 | Environmental Education & Ecotourism

Protecting what people learn to value.

Every visitor, student and local resident becomes part of our mission through educational experiences that inspire long-term stewardship of the Caribbean.

06 | Marine Protected Area Management

Turning protection into action.

Working alongside the Ministry of Environment, we help manage the protected marine area where we operate through monitoring, scientific data collection and on-the-water conservation efforts.

MEMBRESÍAS

Conoce nuestras membresías

Cada aporte cuenta. Al unírte, apoyas iniciativas que protegen nuestros ecosistemas y educan a futuras generaciones.

- ✓ Restauración coralina y arrecifes artificiales
- ✓ Educación ambiental con centros y comunidad
- ✓ Convenio con el Ministerio de Medio Ambiente

Quiero apoyar la fundación

DEJANDO UNA HUELLA POSITIVA

Arrecifes más sanos, comunidades más fuertes

Cada empresa deja una huella donde opera. La nuestra queremos que sea positiva: de la conservación marina al trabajo comunitario, la operación ética y el desarrollo de nuestro equipo. Reservar con nosotros es sumar a un futuro más sostenible para la República Dominicana.

- ✓ US\$ 3.50 por huésped a nuestro equipo operativo
- ✓ US\$ 2.00 por huésped a las iniciativas de la fundación
- ✓ Tercer vivero de coral más importante del país
